Art Unit: 2643

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shibata et al (US PUB. NO. 2001/0004269 hereinafter Shibata).

Shibata discloses a mobile terminal device comprising a hinge portion 30, a second housing 10, a first housing 20, a first image pick-up section 23, a second image pick-up section 33, a position detecting section (axial unit state sensor 55, e.g. see Fig. 13), the various housing components can be positioned in various positions in the same manner as claimed e.g. see Figs. 1-3, 9. Shibata also teaches the axial unit state sensor 55 detects the angular position of the two housings so that predetermined functions is selected for execution based on the detected angular relationship of the two housings, e.g. see Fig. 14, sections [0241-0249], such that when the first camera is activated and the flip is closed the camera is turned off.

As to claims 2-6, see Fig. 13, which discloses the various functions selected for execution based on the detected angular relationship of the two housings.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nishino et al (US PUB. NO. 2001/005454) discloses a portable information terminal equipped with camera.
